

## Houses made on the production line

View video clip: <http://news.bbc.co.uk/1/hi/england/7979333.stm>

### Questions

Define the terms “mass produced” and production line”

Outline two advantages of using a production line approach to making housing

How long does it take to produce a house using this method of production?

What are the three features of these houses that help make them “carbon-neutral”?

Discuss whether the quality of the housing produced using the production line is “fit for purpose”
